

PROGRAM MENU

Discover students' ability to impact the world through experiential education.

Build personal, community and global leadership skills with JUMP!'s life-changing adventure programs.

Our programs are interactive and empowering learning experiences. We take students outside the classroom and their comfort zones to build on their personal growth and leadership skills. We create outdoor activities that are focused on environmental conservation, cultural awareness and other global issues.

Every program we develop is rooted in experiential education— which means “learning from experience or learning by doing”—and tailored to meet the needs of the students and your school. Our program enables students to acquire a deeper sense of self, a better insight into their passion, and the motivation and skills to be actively engaged community members and global citizens.

Regardless of the adventure program your students take, there is a JUMP! program that is right for them. Get in touch with us, email info@jumpfoundation.org.

SOUTHEAST ASIA PROGRAMS

Join us for a life-changing adventure through the diverse and friendly countries of Cambodia, Indonesia, Malaysia and Thailand. Develop your students' global perspective and leadership skills through outdoor activities and cultural immersion. Our Southeast Asia Programs foster understanding for other cultures, sustainable travel practices and awareness of development issues. Students leave our program with a deepened sense of their identity, passion and purpose.

YOGYAKARTA, INDONESIA Exploring Culture, Art and History

DESCRIPTION

The Yogyakarta Urban Exploration is themed around the epic Ramayana, a Sanskrit epic poem that plays an important role in the history and culture across South and Southeast Asia. Ramayana explores human existence, values and relationships.

The program kicks off with a showing of Ramayana ballet overlooking the UNESCO World Heritage Site Prambanan, an ancient Hindu temple. In the following days, students will embark on an urban exploration, visiting ancient temples and natural parks, as well as the old city of Yogyakarta.

The students be exposed to a wealth of history, tradition, arts, culture and language. The program allows them to develop their leadership skills and overcome challenges, while learning about Yogyakarta and its history.

2 GOPENG, MALAYSIA Earth, Wind and Fire

DESCRIPTION

The Gopeng Expedition is themed around the elements of Earth, Wind and Water.

To understand the Water element, students will explore Sungai Kampar river. They will develop leadership and teamwork skills, while experience white water rafting.

Students will participate in a village heritage walk to appreciate the Earth element. They will connect with the local people, and explore local customs, arts and food.

To understand the Wind element, students will be challenged to take a high ropes course at Nomad Adventure's Mountain School (www.nomadadventure.com). Students will expand their personal limits in an exhilarating and safe setting.

SOUTHEAST ASIA PROGRAMS

3 CHIANG MAI, THAILAND Leadership Mountain Range

DESCRIPTION

Focused on developing students' personal identity and roles within communities, this program includes rock climbing, trekking, an adventure race through the old city of Chiang Mai and connecting with local charities.

Rock climbing and trekking enables students to challenge their comfort zone, as well as teamwork dynamics. The adventure race encourages further team building, as well as deeper insight into Thai culture. Visits and interaction with local charities provide students with tangible examples of how local people are addressing development issues in Chiang Mai.

4 BATTAMBANG, CAMBODIA Community Development

DESCRIPTION

The program explores community development by learning from local organizations working with local people. Students also connect with a performing arts school focused on youth empowerment. This program has been designed to engage students to think critically about the world they live in.

EAST ASIA PROGRAMS

Let's experience the diversity of China today. Explore remote areas and booming cities, and learn about the current development issues and dramatic changes that China has gone through in recent history. As students travel across locations in China, hiking beyond roads and learning about life of the local people, we will witness the amazing capacity of people in China to adjust and adapt. And with each new experience we take on, we challenge ourselves to do the same.

5 YUNAN, CHINA Winter Compass Quest

DESCRIPTION

Winter Compass Quest allows students to reflect on their life as they are nearing the end of their academic journey. The program is set in several picturesque locations in Yunnan province.

Students travel to ethnic villages by bike and experience cooking traditional food. They will challenge their own limit and experience hiking on the Tiger Leaping Gorge.

With the support of our expert JUMP! facilitators, students will explore their passion and are encouraged to think globally, in a location that personifies the rich diversity of China.

NEPAL PROGRAM

Experience adventure, wilderness, trekking and more. Our Nepal program offers students an intriguing blend of well-paced, safe outdoor activities. The rugged foothills of the Annapurna Range will reward those willing to go beyond their limit with stunning views of mountain vistas. With many included experiential learning activities, students come away with a full and real appreciation with the people and traditions of this magical Himalayan kingdom.

6 ANNAPURNA, NEPAL Hero's Journey

DESCRIPTION

Hero's Journey is a model developed by Joseph Campbell (1949). It narrates an individual's transformation and involves three phases: departure, initiation and return.

As students soon to be graduating from high school, they are nearing a major transition in their life. The program can be likened to the departure of students from their early life, and entering a new territory in which they can explore new experiences and skills.

After the program, participants are better equipped to navigate their transition into emerging adulthood.
